

Moyco Union Broach

RBS-Rapid Body Shaper

Moyco Union Broach's Nickel Titanium endodontic files employ the revolutionary tip design. Combined with extremely flexible NiTi alloy, these patented Roane bullet tip instruments are designed to follow the canal curvature without ledging.

- Millimeter markings for quick measurement.
- Black shank for easy identification from stainless steel files.
- Five times the flexibility to follow the most extreme canal curvatures.
- Ten times the stress resistance.
- NiTi follows existing canal path.
- Memory no need to pre-bend.
- NiTi decreases zipping and stripping.

And, our line of files is so special even the computer-controlled manufacturing process which yields ultimate flexibility, sharpness, and consistency is patented!
